## Outdoor UPS mounting bracket options

TSi Power's outdoor mounting bracket series enables the UPS enclosures to be easily mounted against a wall, a pole or a pad. TSi Power will attach the mounting bracket(s) at the factory prior to shipping, when mounting options are required.

Fig. 1 - Rear view showing six (6) WM2 wall-mount brackets for outdoor UPS.

### Typical mounting configurations

TSi Power offers various mounting configuration options to provide the utmost flexibility and product performance. For products to be wall or vertically mounted, TSi Power will install four, five or six mounting feet at the back of the enclosure in the factory prior to shipment.

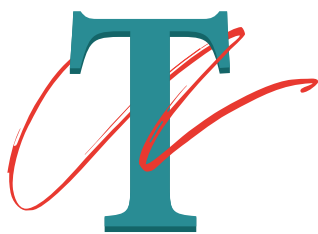

Fig. 2 - Rear view showing PM1 universal pole-mount bracket for outdoor UPS.

A pole-mounting application will come equipped with several different pole-mount bracket designs depending on the size and load carrying requirements.

The pad-mounting option consists of either two (2) or three (3) powder coated aluminum "U" channels in two (2) different sizes, which have been installed in the bottom of the enclosure prior to shipment.

### Features and Benefits

- Convenient, pre-attached mounting feet make for easy wall-mounting.
- Factory attachment of wall mounting feet facilitates field placement and assures quality installation.
- Universal pole-mount bracket design enables the UPS to be lifted onto pole bracket for quick and easy installation.
- Pole-mount brackets can be mounted with either through bolts or stainless steel banding.
- Platform pole-mount bracket is available for larger UPS' with heavier battery loads.
- Stainless steel universal pole-mount brackets provide corrosion resistance for long-lasting durability.
- Pad-mount brackets are carefully sized to the product to ensure stability.
- Powder-coated aluminum pad-mount brackets prevent corrosion from contact with concrete.
- Easily accessible mounting-pad holes speed up installation.
- Includes a two-year limited warranty on all mounting bracket options.
