Pure sine wave

wide temperature batteries

voltage regulation

## Outdoor XUPs model

### 1000AHV

1000 VA  
700 watts  
230 vac  
25 min @700W  
1 hr @350W  
-20° to +60°C;  
-40° to +60°C  
with optional  
battery heater

### 1000BHV

1000 VA  
700 watts  
230 vac  
50 min @700W  
2 hrs @350W  
-20° to +60°C;  
-40° to +60°C  
with optional  
battery heater

## Outdoor UPS with voltage regulation

The TSi Outdoor XUPs-1000AHV/BHV are constructed with extreme/wide temperature batteries, and are housed in a weather protected IP44 (NEMA-3R) enclosure. These units offer line-interactive automatic voltage regulation, over/under-voltage protection, surge protection with heavy-duty noise filtering, communications capability and optional extended battery backup.

### Key Outdoor XUPs benefits

This rugged UPS design, with microprocessor-controlled 20 kHz sine wave inverter and optional conformal coated boards, reduces the number of solid-state devices required for power conversion and is suitable for use in severe outdoor environments.

Outdoor XUPs extreme/wide temperature batteries allow operation of the UPS system over an ambient temperature range of -20° to +60°C (-4° to +140°F); -40° to +60°C (-40° to +140°F) with optional battery heater. Built-in automatic voltage regulation enables a wide input voltage window within which power is delivered without having to drain or exercise the batteries, thereby ensuring long battery life. A fan exhausts hot air to protect batteries and electronics.

Battery run-times for: OutdoorXUPs-1000AHV are 25 minutes at 700 watts load, and 1 hour with a 350 watts load; battery run-times for the OutdoorXUPs-1000BHV are 50 minutes at 700 watts load, and 2 hours with a 350 watts load.

### How the Outdoor XUPs works

The Outdoor XUPs Series UPS provides automatic voltage regulation with surge protection and noise filtering, as well as overvoltage protection with a threshold of 280 vac, and undervoltage protection with a threshold of 190 vac. Upon a brownout, overvoltage, or loss of power, the XUPs will transfer to battery power in less than 4 milliseconds, enabling uninterrupted operation of computer, telecom, surveillance, signaling or other systems.

LEDs provide visual assessment of UPS status. By unlatching, the front door swings open; inside the cabinet is an array of LED status indicators and a power on/off control switch.

### Typical applications

This heavy duty outdoor UPS system is ideal for protection of WiFi/GSM/CDMA/satellite base stations, wireless communications/perimeter surveillance and security/gate control systems, LED traffic light/roadway display systems and industrial remote terminal units (RTUs).

### Key Outdoor XUPs features

- Cabinet can be pedestal (ground), pole, or wall mounted
- Full weather outdoor protection IP44 (NEMA-3R) metal cabinet
- Pure sine wave output
- Over/under-voltage protection
- Remote power on/off (optional)
- Wide temperature batteries
- Heavy-duty surge protection and noise filtering
- Automatic voltage regulation
- Comprehensive array of status bargraphs for voltage, load and battery levels
- Two year warranty on electronics  
One year warranty on batteries

Specification	OutdoorXUPs-1000AHV	OutdoorXUPs-1000BHV
<b>Electrical</b>		
Capacity in VA (watts)	1000VA (700W)	
UPS topology	High efficiency line-interactive with 20 kHz PWM sine wave inverter.	
<b>Input</b>		
Nominal voltage	230 volts ac	
Input current	4.2 amperes maximum @ 230 vac	
Operating voltage	190 – 280 vac without using batteries	
Operating frequency	47 – 63Hz	
<b>Output</b>		
Nominal voltage	230 volts ac	
Voltage regulation	230 vac +/-8% upon changes in line or load.	
Crest ratio	3:1	
Output waveform	Pure sine wave, less than 3% THD with linear load.	
Power efficiency	97%, under full load conditions.	
Power on/off switch	On/off rocker style power switch.	
Transfer time	<4 milliseconds	
Batteries	32 ampere hours, 24 vdc                      64 ampere hours, 24 vdc Wide temperature sealed gel-cells -20° to +60°C (-4° to +140°F); -40° to +60°C (-40° to +140°F) with optional battery heater.	
Battery backup time	25 minutes @ 700 watts load. 1 hour @ 350 watts load.	50 minutes @ 700 watts load. 2 hours @ 350 watts load.
Recharge time	8 hours to 90% capacity after full discharge.	16 hours to 90% capacity after full discharge.
SNMP interface for UPS monitoring and automatic shutdown configuration (optional)	Using an external SNMP adapter, the RS-232 signals (from the DB-9 female connector) from the UPS can be converted to 10M/100M fast Ethernet signals (and RJ-45 connection) for external UPS monitoring/configuration capability using Telnet, web browsers, or NMS (most such external devices support TCP/IP, UDP, SNMP, Telnet, SNTP, PPP, HTTP & SMTP protocols).	
Surge let-through voltages	Test pulse injection: Line-neutral: Line-ground: and Neutral-ground. Combination wave: L-N: 450V, L-G: 300V, N-G: 300V	
Status indicators	5 LED load level indicator: 0 to 100% of rated load. 5 LED battery charge level indicator from 0 to 100% of rated charge. 3 LED indicators for: in boost, buck or normal mode. 3 LED indicators for: inverter on/off, battery fault, and overload.	
Input/output connections	3 position terminal blocks provided for 3 x 1.5mm <sup>2</sup> (16AWG) connections via 25 mm (1") liquid-tight cable glands.	
<b>Physical</b>		
Dimensions	610mm (24") wide x 305mm (12") deep x 762mm (30") high	
Weights	50kg (110 lbs)	73kg (160 lbs)
Steel cabinet	Full weather IP44 (NEMA-3R) outdoor design.	
Mounting options	Bolting or banding mountable to monopole via optional 'H' style bracket (steel mounting bands not included), pedestal (ground) or wall mountable. Four wall mounting 'feet' are included.	
<b>Environmental</b>		
Operating temperature, battery heater option and cooling method	-20° to +60°C (-4° to +140°F) ambient air temperature. -40° to +60°C (-40° to +140°F) with optional battery heater. Thermostat controlled exhaust fan.	
Moisture protection (optional)	Optional conformal coating of electronic boards is available for moisture resistance to protect against high humidity environments.	
<b>Warranty</b>		
Warranty	Two year limited warranty, parts and labor. One year battery warranty.

### OutdoorXUPs-1000AHV/BHV system architecture

### OutdoorXUPs-1000AHV/BHV at a glance

Heavy-duty outdoor UPS with line-interactive automatic voltage regulation and extreme/wide temperature batteries

- Wide ambient temperature range sealed gel-cell batteries: -20° to +60°C (-4° to +140°F); or -40° to +60°C (-40° to +140°F) with optional thermostat controlled battery heater
- 24 vdc battery bus
- **25 minutes @ 700 watts**, or 1 hour @ 350 watts with **The OutdoorXUPs-1000AHV**
- **50 minutes @ 700 watts**, or 2 hours @ 350 watts with **the OutdoorXUPs-1000BHV**
- 230 vac +/- 8% output from 190 – 280 vac input without going to batteries
- Weather protected IP44 (NEMA-3R) painted metal cabinet
- SNMP compatible (optional)
- Less than 4ms transfer time
- Microprocessor-controlled 20 kHz PWM sine wave inverter
- Thermostat controlled fan is included

# Outdoor XUPs

## Mounting on a concrete pad with U-channel

Following is a drawing of a recommended pedestal/concrete pad mounted installation using the TSi Power aluminum U-channel mounting brackets. When ordered with these, the units will come with them already bolted to the bottom of the cabinet. There are four pre-drilled bolt holes that will then allow bolting of the unit to a concrete pad or other mounting surface, such as a Quazite® pad or Unistrut®.

## Outdoor XUPs pad mounted
